PROJECTS

A Platform To Grow Your Brand — <https://www.inbranded.co>

- Built the website's frontend ui and logic from scratch using ReactJs, Redux for state management and Redux-saga middleware for asynchronous actions in redux.
- Implemented DOM intensive logic and api consumption via endpoints made available to me.
- Implemented new features on the design builder.
- Built an admin dashboard for the website with React and Typescript, implementing various roles and permissions with restricted pages.

A Timesheet Application For Tracking Time — <https://www.syncbit.io/>

- Worked on the website's frontend ui and logic using ReactJs, Redux for state management and Redux-thunk middleware for asynchronous actions in redux.
- Consumed apis and made the website responsive.
- Implemented pwa on the web app for better user experience.

E-Currency Platform — <https://exchangeindeed.com/>

- Continued work on the existing website with vanilla JavaScript and jQuery.
- Implemented the front end logic of adding push notifications with firebase, integrating the app with monnify, phone number verification with firebase and other features to make the admin have more control over

SKILLS

- JavaScript
- ReactJS
- Typescript
- jQuery
- HTML and CSS
- Scss
- Material UI
- Redux, Redux-thunk and Redux-saga

Soft Skills

- **Personal Skills:**
Ability to learn whatever is necessary to get the job done, great communication skills, ability to get work done effectively and at the stipulated time.
- **Leadership Skills:**
Ability to work well with people and ensure instructions are carried out.

the features they want enabled, the ones they want visible to only certain customers among many others.

- Made the website highly responsive on different screen sizes.

Chows App Website — <https://chowapps.com>

- Built the website of chowapps with HTML, CSS and Vanilla JavaScript, which is fully responsive with clean code and a nice UI.

Movie Search Website — <https://pelzmovies.netlify.app>

- Built with React.js, scss, redux and redux-thunk.
- Implemented the hooks feature namely (useEffect, useState, useSelector and useDispatch).
- Worked with an api to dynamically display movie details content.
- Implemented RWD (Responsive Web Design) making the website very fluid and responsive.

E-Commerce Website — <https://crwclothings.netlify.app>

- Built with React.js to handle the front end, utilizing redux as the central store.
- Implemented sign in and sign out functionality with firebase and payment with the stripe API.
- Fully responsive with a nice User Interface (UI).

EXPERIENCE

Inbranded — *Front end developer*

March 2021 - Present

Responsibilities:

- Building and adding new features to improve the brand.
- Brainstorming during meetings with other team members on features to implement, modifications

and changes that will make the brand grow.

Nation Delivery Services Ltd — *Front end developer*

December 2020 - May 2021

Responsibilities:

- Converting customers' needs and features they want to code on the website.
- Thinking of how best to implement a feature that would not break other existing features and also be profitable for the client and easy to use for the users.
- Coding and designing the front end interface of their website.
- Maintained and added new features to the customer's existing WordPress website.

EDUCATION

Lagos State University — *Bachelor of Science (Zoology)*

CGPA: 4.52 (First Class Honors)
