SKILLS

- JavaScript
- ReactJS
- jQuery
- HTML and CSS
- Scss
- Material UI
- Redux, Redux-thunk and Redux-saga

Soft Skills

- **Personal Skills: Ability to learn on the job, great communication skills, ability to get work done effectively and at the stipulated time.**
- **Leadership Skills: Ability to work well with people and ensure instructions are carried out.**

PROJECTS

A Platform To Grow Your Brand — *https://inbranded.co*

- Built the website's dashboard from scratch using ReactJs, Redux and Redux-saga
- Implemented DOM intensive and api consumption features on the website.

E-Currency Platform — *https://exchangeindeed.com/*

- Continued work on the existing website with vanilla JavaScript and jQuery.
- Implemented the front end logic of adding push notifications with firebase, integrating the app with monnify, phone number verification with firebase and other features to make the admin have more control over the features they want enabled, the ones they want visible to only certain customers among many others.
- Made the website highly responsive on different screen sizes.

Movie Search Website — *https://pelzmovies.netlify.app*

- Built with React.js, scss, redux and redux-thunk.
- Implemented the hooks feature namely (useEffect, useState, useSelector and useDispatch).
- Worked with an api to dynamically display movie details content.
- Implemented RWD (Responsive Web Design) making the website very fluid and responsive.

Music Web Application— *https://pelzplay.netlify.app/*

- Built with React, redux and redux-thunk for making asynchronous actions in my redux code, I made this into a progressive web application, making it look more like a mobile application, fast and smooth.

- Also fully responsive.

Chows App Website — *https://chowapps.com*

- Built the website of chowapps with HTML, CSS and Vanilla JavaScript, which is fully responsive with clean code and a nice UI.

E-Commerce Website— *https://crwclothings.netlify.app*

- Built with React.js to handle the front end, utilizing redux as the central store.
- Implemented sign in and sign out functionality with firebase and payment with the stripe API
- Fully responsive with a nice User Interface (UI).

EXPERIENCE

Nation Delivery Services Ltd— *Front end developer*

December 2020 - May 2021

Responsibilities:

- Converting customers' needs and features they want to code on the website.

- Thinking of how best to implement a feature that would not break other existing features and also be profitable for the client and easy to use for the users.

- Coding and designing the front end interface of their website.

- Maintained and added new features to the customer's existing WordPress website.

EDUCATION

Lagos State University — *Bachelor of Science (Zoology)*
CGPA: 4.52 (First Class Honors)
